

# Remote Access Guide

## Overview

This guide will help you understand the cloud vendor specific rules and guideline for remotely accessing the "NetFoundry Zero Trust Network" image once it's instantiated.

### Important

SSH Password Authentication is **Disabled** by default on all cloud environments

### Important

SSH Root login is **Disabled** by default on all cloud environments, except in those that can only use root. You know who you are!

## OCP Specifics

- Username Allowed: "opc" only
- Root Allowed: No
- Password Authentication: No

The Oracle Cloud platform only allows the user "opc". You can paste in ssh key while launching the instance or create key in the account.
