

# Remote Access Guide

## Overview

This guide will help you understand the cloud vendor specific rules and guideline for remotely accessing the "NetFoundry Zero Trust Network" image once it's instantiated.

### Important

SSH Password Authentication is **Disabled** by default on all cloud environments

### Important

SSH Root login is **Disabled** by default on all cloud environments, except in those that can only use root. You know who you are!

### Note

If you use the NetFoundry default user "nfadmin" you must use an ssh key!

## Azure Specifics

- Username Allowed: Any
- Root Allowed: No
- Password Authentication: Yes

Azure allows you to choose a username when launching an instance.

Please assign an ssh key when launching the instance, if you wish to access this machine post deployment.
