Create appwan client

Create AppWan

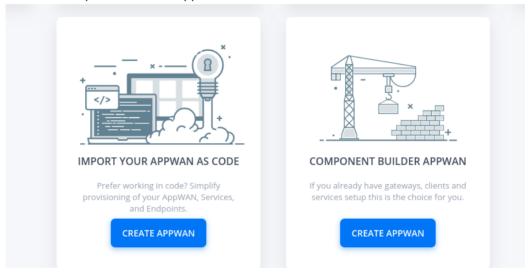

This section will guide a user through the steps on how to enable service connectivity to users by creating an appwan.

- 1. Navigate to Manage AppWANS Page under Manage Appwans
- 2. Click on + sign in the top right corner.

3. Click on "Component Builder Appwan"

4. Move the desired client (e.g. DemoClient01) from "Available" Clients to "Selected" Endpoints. Move the desired service (e.g. DemoServiceSsh) from "Available" to "Selected"

Services. CREATE A NEW APPWAN Choose from existing components, or add new ones 1 APPWAN NAME DemoAppWan 2 ADD CLIENTS, GATEWAYS, OR ENDPOINT GROUPS ADD NEW 🕕 SELECTED ENDPOINTS AVAILABLE GROUPS DemoClient01 ADD NEW 🕕 AVAILABLE CLIENTS AVAILABLE GATEWAYS ADD NEW 🕕 AzureDemo01 3 ADD SERVICES Search for a Service AVAILABLE SERVICES ADD NEW 🜐 SELECTED SERVICES DemoServiceSsh
